BrassetsGroup

INTELLIGENT THREAT DETECTION

PERIMETER SECURITY SOLUTIONS

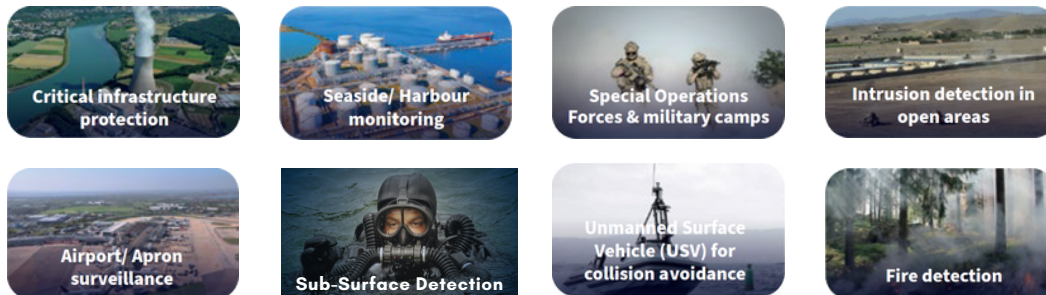

We integrate the world's leading technologies into intelligent threat detection systems for the protection of critical infrastructure, assets and people.

- Detection and classification of Humans, Vehicles and Vessels to 9km. Detection and classification of Drones to 5km.
- Detection and classification of sub-surface threats including Divers to 1km and Mini-sub's and UUV's to 1.5km.

BENEFITS

- Layered security technology strategy for 720 degree protection.
- Single user interface.
- AI powered for advanced detection.
- Automated IFF detection and classification of threats.
- Trajectory and XY coordinates.
- Integration into operating and weapons systems.

APPLICATIONS

TECHNICAL SPECIFICATIONS

Detection Range Air	Drones (Up to 5km)
Detection Range Land	Human/Vehicle/RHIB (Up to 9km)
Detection Range Sub-Surface	Divers (Up to 1km) Mini Subs/UUVs (Up to 1.5km)

Brassets Group are a 50% Indigenous owned, Australian SME with a proven track record of delivering layered technology strategy, design, engineering and implementation of specialist security technology solutions to the Australian Department of Defence and Government Departments.

The ingenuity is in the strategy and how we expertly integrate the world's leading products to deliver seamless solutions that increase the security of people and assets, while driving capability and economic value.
